

Proxima Health — Week 1

Analytics Report

proxima.health | April 7–10, 2026

Site: proxima.health | **Period:** April 7–10, 2026 (first 3.5 days of live traffic) | **Source:** Vercel Web Analytics

Analytics were wired up on April 1, but meaningful traffic began April 7 when the site was shared externally. April 10 reflects a partial day (data pulled mid-day).

Summary

Total Pageviews	Unique Visitors	Pages / Visitor	Avg Pageviews / Day
439	143	3.1	127

Daily Traffic

Date	Pageviews	Unique Visitors
Tue, Apr 7	63	26
Wed, Apr 8	186	78
Thu, Apr 9	131	45
Fri, Apr 10 (partial)	59	23
Total	439	143

April 8 saw the highest traffic, likely corresponding to an initial share or outreach push. Traffic remained strong on April 9, suggesting sustained interest beyond the first-day spike.

Top Pages

Page	Pageviews	Visitors	Bounce Rate
/ (Homepage)	143	114	78%
/science	60	44	66%
/interventions	43	33	63%
/diagnostics	41	31	57%
/practitioners	41	31	63%
/about	25	22	80%
/waitlist	17	17	100%
/s/INUSpheresis Booklet (PDF)	7	6	71%
/privacy	2	2	100%
/contact	1	1	100%

Key observations

- **Homepage captures all traffic** — 143 of 143 visitors hit the homepage first.
- **/science is the #2 page** — visitors are engaging with the scientific evidence content. The 66% bounce rate means 1 in 3 visitors continued to another page after reading.
- **/diagnostics has the lowest bounce rate (57%)** — the testing page is the strongest at driving further exploration.
- **/waitlist received 17 visits** — this is the conversion funnel endpoint. All 17 were bounces (expected, as there's nowhere to go after submitting).
- **INUSpheresis PDF** was accessed 7 times — people are finding and downloading the clinical booklet.

Traffic Sources

Referrer	Pageviews	% of Total
Direct / No referrer	354	81%
google.com	11	3%

Referrer	Pageviews	% of Total
Microsoft Teams (CDN)	4	1%
vercel.com	3	1%
mail.google.com	3	1%
linkedin.com	2	<1%
t.co (Twitter/X)	1	<1%
lennysnewsletter.com	1	<1%
bing.com	1	<1%

Key observations

- **81% direct traffic** — most visitors arrived via direct links (shared URLs, bookmarks, or messaging apps that strip referrers).
- **Google organic (11 pageviews)** — early SEO traction is appearing. The 25 blog posts published April 1 may be starting to index.
- **Microsoft Teams** — the site is being shared in Teams channels (4 pageviews from the Teams CDN referrer).
- **LinkedIn and Twitter** — minimal social referral so far, but both channels are represented.

Geographic Breakdown

Country	Pageviews	% of Total
United States	139	32%
Switzerland	86	20%
Thailand	32	7%
Canada	19	4%
India	19	4%
Germany	18	4%
United Kingdom	18	4%
Brazil	14	3%
Portugal	13	3%

Country	Pageviews	% of Total
Argentina	7	2%
New Zealand	5	1%
France	4	1%
Costa Rica	3	1%
Other (SG, VN, JM)	3	1%

Key observations

- **US and Switzerland dominate** — together accounting for 52% of all traffic. This aligns with Proxima’s target markets.
- **15 countries represented** in just 3 days — broad international interest.
- **Thailand at 7%** — unexpected but notable; worth investigating whether this is a specific practitioner network.

Device & Technology

Device Type

Type	Pageviews	% of Total
Desktop	288	76%
Mobile	92	24%

Browser

Browser	Pageviews	% of Total
Chrome (Desktop)	177	47%
Chrome Mobile iOS	53	14%
Safari (Desktop)	46	12%
Opera	43	11%
Microsoft Edge	23	6%
Mobile Safari	21	6%
Chrome Mobile (Android)	7	2%
Brave	6	2%

Browser	Pageviews	% of Total
Google Search App	3	1%

Operating System

OS	Pageviews	% of Total
macOS	200	53%
iOS	85	22%
Windows	75	20%
Linux	13	3%
Android	7	2%

Key observations

- **76% desktop** — this is a professional/research audience, not casual mobile browsing.
- **macOS dominates at 53%** — skews toward the practitioner/health-professional demographic.
- **Opera at 11%** is unusually high — possibly a cluster of users in one region (Switzerland or Thailand).

Custom Event Tracking

These are custom analytics events we instrumented across the site:

Event	Count	Notes
scroll_depth	217	Fired at 25/50/75/100% scroll milestones
nav_clicked	192	Navigation bar link clicks
quiz_question_answered	75	Individual quiz question responses
footer_link_clicked	29	Footer navigation clicks
cta_clicked	10	Call-to-action button clicks
quiz_started	8	Users who began the diagnostic quiz

Event	Count	Notes
quiz_completed	7	Users who finished the quiz (87.5% completion)
diagnostics_signup_submitted	3	Signed up for diagnostic testing
quiz_email_submitted	3	Provided email after quiz
quiz_email_skipped	3	Skipped email after quiz
quiz_question_back	2	Used back button in quiz
research_link_clicked	1	Clicked external research link
quiz_why_we_ask_opened	1	Opened “why we ask” explainer

Funnel Analysis: Diagnostic Quiz

Stage	Count	Drop-off
Quiz started	8	—
Quiz completed	7	12.5%
Email submitted	3	57%
Email skipped	3	—
Diagnostic signup	3	—

- **87.5% quiz completion rate** — excellent. Nearly everyone who starts the quiz finishes it.
- **50% email capture rate** — of 6 post-quiz users (3 submitted + 3 skipped), half provided their email.
- **3 diagnostic signups** in the first 3 days — these are high-intent leads.

Engagement Signals

- **217 scroll depth events** across ~143 visitors means most visitors triggered at least one scroll milestone — they’re reading, not bouncing at the hero.
- **192 nav clicks** — visitors are actively exploring the site, not landing and leaving.

- **10 CTA clicks** — the call-to-action buttons are being used but could potentially be improved with better placement or copy.

Recommendations

1. **Double down on content sharing** — 81% direct traffic suggests the link is being passed around. Provide easy share links and consider a “Share with a colleague” CTA.
2. **Monitor SEO growth** — 11 Google pageviews in 3 days is promising for a brand-new site with 25 blog posts. Track which keywords are driving traffic.
3. **Investigate Thailand traffic** — 7% from Thailand is unexpected. If it's organic, there may be a practitioner community to engage.
4. **Optimize the quiz email capture** — 50% email rate is good, but the 3 skips represent lost leads. Consider adding more value to the email prompt (e.g., “Get your personalized report via email”).
5. **Mobile experience** — 24% mobile traffic is significant. Ensure the quiz and signup flows work smoothly on mobile.
6. **CTA optimization** — only 10 CTA clicks from 439 pageviews (2.3%). Test different copy, colors, or placement.
